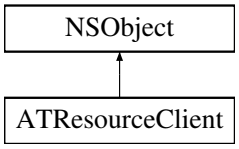
A.2.19 ATResourceClient Class Reference

Inheritance diagram for ATResourceClient:



Public Member Functions

(id) - **initWithSynchronizer:**

(void) - **setBaseURL:**

(void) - **addHeader:withValue:**

(void) - **fetchEntity:**

(void) - **didFetchItem:withURI:**

(void) - **saveObject:**

(void) - **saveObject:options:**

(void) - **loadRoute:params:delegate:**

(void) - **loadRoutesFromResource:**

(ATRoute) - **routeForEntity:action:**

(ATRoute) - **routeForEntity:action:params:**

Properties

ATSynchronizer * **sync**

RKClient * **client**

NSDictionary * **routes**

NSString * **IDField**

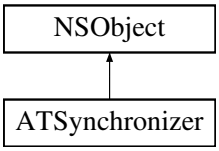
The documentation for this class was generated from the following files:

ATResourceClient.h

ATResourceClient.m

A.2.20 ATSynchronizer Class Reference

Inheritance diagram for ATSynchronizer:



Public Member Functions

(id) - **initWithAppContext:**

(void) - **close**

(NSString *) - **authKeyOrNull**

(void) - **fetchEntity:**

(void) - **syncObject:**

(void) - **startSync**

(void) - **sync**

(void) - **updateObjectAtURI:withDictionary:**

(void) - **changeURIFrom:to:**

(void) - **startAutosync**

(void) - **stopAutosync**

(void) - **_didChangeAppObject:**

Protected Attributes

ATMappingHelper * _mappingHelper

ATMetaContext * _metaContext

ATAppContext * **_appContext**

ATMessageClient * _messageClient

ATResourceClient * **_resourceClient**

NSString * _authKey

BOOL **_isSyncScheduled**

Properties

ATMetaContext * **metaContext**

ATAppContext * **appContext**

ATMappingHelper * **mappingHelper**

ATMessageClient * **messageClient**

ATResourceClient * **resourceClient**

NSString * **authKey**

id< ATSynchronizerDelegate > delegate

A.2.21 Member Data Documentation

A.2.22 - (NSString∗) _authKey [protected]

State

A.2.23 - (ATMappingHelper∗) _mappingHelper [protected]

Helper

A.2.24 - (ATMessageClient∗) _messageClient [protected]

Networking clients

A.2.25 - (ATMetaContext∗) _metaContext [protected]

Context

A.2.26 Property Documentation

A.2.27 - (id< ATSynchronizerDelegate >) delegate [read, write, assign]

Delegate

The documentation for this class was generated from the following files:

ATSynchronizer.h

ATSynchronizer.m

A.2.28 <ATSynchronizerDelegate> Protocol Reference

Public Member Functions

(void) - **clientAuthDidSucceed:**

(void) - **clientAuthDidFail:**

The documentation for this protocol was generated from the following file:

ATSynchronizer.h
